EXPERIENCE

Intern at Frontend Simplified Virtual Internship | [Certificate](#) (2024)

- Transformed a completely static HTML, CSS, JavaScript, and React single page application into an interactive user interface using animations, transitions, and carousels.
- Processed API requests to dynamically represent data from a cloud server and represent it through skeleton loading states, pagination, and dynamic routing.
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment.

Desktop Support Technician II at UHS of Delaware, Inc. (2014 - 2024)

- Assist in desktop support and operation of the Help Desk, including and ticket assignment, follow-up with end users, and ticket resolution.
- Assist with AD administration including creating, disabling, and managing user accounts and Organizational Units (OUs).
- Collaborate with senior IT staff to support directory services and ensure accuracy in user management.
- Provide onsite and remote support for corporate networked and local systems, including software installation and troubleshooting.
- Assist in maintaining DNS, DHCP, and endpoint protection software.

PROJECTS

MoviePix movie application | [Website](#) | [Github](#) Oct 2024 ● This project serves as the culmination of Week 6, designed to demonstrate my proficiency in the concepts covered up to that point. Key objectives included integrating data from an API, designing a site that effectively utilizes that information, and ensuring the application is dynamic. The project was built exclusively using HTML, CSS, JavaScript, and React, as per the guidelines provided.

Ultraverse NFT World application | [Website](#) | [Github](#) Nov 2024 ● Transformed a completely static HTML, CSS, JavaScript, and React single page application into an interactive user interface using animations, transitions, and carousels. We processed API requests to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination, and dynamic routing. Also utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment.

Library application | [Website](#) | [Github](#) Sep 2024 ● A dynamic and fully interactive library application built with React.js, HTML, CSS, and JavaScript. This project expands upon its original version, introducing individual book detail pages and a fully functional shopping cart. The application leverages React's component-based architecture to create a seamless user experience.

EDUCATION

Frontend Simplified Bootcamp (Apr 2024 -present) ● Classes: HTML, CSS, JavaScript, React, TypeScript, Backend Development, Data Structures & Algorithms

OTHER

- **Languages:** HTML, CSS, Tailwindcss, JavaScript, React, Redux, Node.js
- **Technical Skills:** NPM, Yarn, Git (+GitHub & BitBucket)
